Administrator Murphy, Commissioner Thomas, and Assistant Commissioner Ely,

Thank you for taking the time to meet with me and my team yesterday. We are very excited about the opportunity to support our customers directly through this partnership with GSA. The Administration's commitment to IT modernization has demonstrated some of the most progressive IT policy priorities we've seen at the federal level, and we hope that bringing more commercial technologies like AWS can help accelerate the White House's implementation strategy.

As we work on completing next steps, please do not hesitate to reach out to me or my team for assistance. We are here for you!

Sincerely,

(b) (6), (b) (4)

Is the answer that I couldn't think of over dinner the other day! That's the PaaS offering that a lot of the techies love, and I think it was the platform for 18F's cloud.gov stuff.
Also, it was Dominic Sale who I presented at the same conference with recently.

Anil –

It was great catching up (I miss gov and love hearing about what's going on). Please let me know if there's anything at all I can help with – though there may be details to work out, I'm a big supporter of TTS and what you're trying to do there.

I think there are several interesting challenges in government IT – one, obviously, is improving digital interactions with the public. But the other one, and the one that I was also focused on, is how to bring leanness and nimbleness to government IT in general, including the non-public-facing systems. A good example was my challenge with immigration. Many people assumed that it was challenging for us to build the public-facing electronic applications, etc. for applicants. It wasn't – that was the easy part. But the real challenge, and what determined the pace at which we could work, was building the systems that were used internally to the agency, the systems that adjudicators used to assess the immigrants' applications and that the fraud / national security unit used to spot possible bad behavior. That type of work is where the gov is spending lots of dollars and where they are only getting a tiny portion of the value they should be getting. Fixing that requires re-working everything from capital budgeting (E-300s), investment oversight (DHS's MD-102), procurement (FAR), QA, IV&V, security, section 508 compliance, etc. We did a lot of good work on all of those areas at USCIS. You might enjoy seeing the official policies that I wrote to guide USCIS IT – essentially enforcing good practices – my judo move on gov bureaucracy, making my even better bureaucracy ⏎

In any case, feel free to contact me any time!

Brett
Absolutely.
I suggest a two-parter; 1) follow-up targeted discussion with the team here, then, 2) the legal/contract folks discussion.
I want to ensure before we get with the legal/contract groups that we're on the same page and can "translate" where needed.
Are there dates/times in he middle of next week that won't work for a follow up?
Bill Zielinski

Hi John,
Great to hear from you! Yes, I am sure we would be able to accommodate and assist but I wanted to get
a little bit more info so I can engage the proper people. Would this be to support GSA as a direct
customer? Or to support GSA as a Govt wide initiative as you work to help other agencies? I am
thinking this is related to the latter, but please let me know.

As far as the actual security meeting, are you envisioning like a 2-3 hour meeting? Or more of a half
day?

Thank you,

All,

On behalf of MeriTalk, I would like to thank you for your participation in the Cloud + MGT: Powering Government Innovation program.

The event was a tremendous success and we have received positive feedback from attendees on your remarks during the panel. We know your time is valuable and want to thank you for taking the time out of your day to share your perspective on the importance of shared services.

We will plan to share pictures and press coverage from the event with you next week.

We truly appreciate your contribution to this year's event and we hope to work with you again in the future.

Best,

Hi John (thanks for looping me in ████

We would be happy to help provide input on security considerations regarding cloud adoption. Are there specific workloads or security programs you're interested in, or a more general overview and discussion of topics affecting cloud?

I will find times our solution architects team can be available to meet with your team - will this meeting take place at GSA?

Thanks,

Hi John,

Great to hear from you! Yes, I am sure we would be able to accommodate and assist but I wanted to get a little bit more info so I can engage the proper people. Would this be to support GSA as a direct customer? Or to support GSA as a Govt wide initiative as you work to help other agencies? I am thinking this is related to the latter, but please let me know.

As far as the actual security meeting, are you envisioning like a 2-3 hour meeting? Or more of a half day?

Thank you,

Hi Emily! I've got some exciting new to share. You will likely be hearing soon from your internal teams that AWS is submitting a MAS proposal for our AWS Secret Region services. If approved, this would mean that agencies across government with SECRET workloads would have access to AWS services in the Secret Region through Schedule 70. It's a pretty big departure from our current model of mostly indirect work, so I wanted to make sure you were aware, and offer a meeting with ██████ and her team to talk you through our decision to submit a proposal. In short, we've heard from a lot of customers that they wished they could go direct to an OEM for these kinds of services, and as a customer obsessed company we want to try our best to meet the needs of our government customers.

Let me know if you'd be interested in meeting with ████ in the coming weeks and I'll get you connected to her team.

Administrator Murphy, Commissioner Thomas, and Assistant Commissioner Ely,

Thank you for taking the time to meet with me and my team yesterday. We are very excited
about the opportunity to support our customers directly through this partnership with GSA. The
Administration's commitment to IT modernization has demonstrated some of the most
progressive IT policy priorities we've seen at the federal level, and we hope that bringing more
commercial technologies like AWS can help accelerate the White House's implementation
strategy.

As we work on completing next steps, please do not hesitate to reach out to me or my team for
assistance. We are here for you!

Sincerely,

Hi Emily!

I wanted to let you know that (b) (4), (b) (6) Amazon Web Services (b) (4), (b) (6)
will be in town next Friday, March 23rd and wanted to offer some time to share IT
procurement best practices with you and your leadership team from what we've seen in the
commercial market. AWS Marketplace, a dynamic software marketplace, allows both our commercial
and public sector customers access innovation as they need it and encourages experimentation. Dave
has some pretty insightful stories about how this allows our customers to be more agile and iterative in
their buying practices. These kinds of marketplaces can complement policy initiatives like software
category management and MEGABYTE Act implementation as well.

I know it is very last minute, but any chance you'd be available for a chat with him while he's here?

Emily and Jeff,

Thank you so much for taking the time out of your day on Friday to meet with me. Unfortunately, as you are undoubtedly well aware, wearing my Patriots jersey didn't bring about the kind of good luck I was hoping it would. Thanks for tolerating my show of support nonetheless.

If and when it is helpful, I would welcome the opportunity to partner with you and the team at GSA to work on policy solutions that positively impact our agency customers. The consumption-based model, the roll out of the COEs, and new ways of purchasing (I have some ideas on software) are all important to helping customer agencies procure the tools they need to meet their missions. There has been a lot of great momentum built up with the passage of the MGT Act, the Report to the President on IT Modernization, the COEs, etc., and helping you help your customers (who are ultimately our customers) is something I'd like to continue to work on. Let me know how my team and I can best be of assistance.

To follow up on our conversation regarding MGT Act timing, I suspect the anachronistic reference to a "Section 1094(b)(1)" in the enrolled act might be causing some confusion (1094 was the section number for the TMF section in the Senate-passed version). Originally, I was reading the 90 day delay as only pertinent to enrolled Section 1078 (TMF), and not to enrolled Section 1077 (WCFs). Based on your interpretation, does that still give you reason to ere on the side of a mid-March WCF implementation for GSA? Or does just introduce added challenges?

Keep in touch,
Erica

Hello - hope you are enjoying your day off. At least your one day closer to full confirmation!

When you're back next week, can we connect on Section 846 of the FY 18 NDAA (new Section 801)? It's a bit different from the House-passed version, so running through a few analyses and would be curious to your teams' perspectives.

Chat soon,

(b) (6)

Hi Mary! So fantastic to hear from you. My amazon email is super simple (!) - (b) (4), (b) (6)amazon.com.

I would welcome an opportunity to sit down with you and Alan - makes a lot of sense. We can walk you and Alan through Amazon Business in greater detail. Either day (23rd or 25th works) - so let me know what's best for you guys. Let me know if you guys would also like to grab dinner or a drink (but of course would let you pay for yourselves)!

Take care (b) (4), (b) (6)

Hello to you! How's things? Hope you are having a blast. Alan Thomas, the new FAS Commissioner and I are traveling to Seattle Oct 23, spending the day in the regional office on the 24th, and flying to San Fran late morning on the 25th. So, I was wondering if you were going to be in Seattle at that time and if you'd be interested in getting together either mid to late day on the 23rd or the morning of the 25th. We are going to pursue commercial platform and would be interested in discussing.   And would love your amazon email address :)

Mary

Hi Mary, hope you're doing well! Quick question: we've been trying to update our SAM registration for several months to reflect a new legal entity, but we've been locked out of our account. We spoke to Melissa Gary, the GSA ombudsmen, who said they're aware. We've been bounced around a few times, and hoping you might direct us to someone who can help. Unfortunately, we're blocked from doing business with certain entities until we can resolve this, so we're eager to get into our records to update. Thank you! Anne

Mary, do yo have ten minutes today to catch up? I want to get a gut check on how best to spend your meeting time in Seattle - IF the legislation is enacted, I have a sense of how GSA will want to approach this (first you have to select providers, then you will want to implement something incrementally/phased approach), but I want to make sure that I'm not way off the mark. It will help me design a discussion/agenda for our meeting next month. I'm at (b) (4), (b) (6) happy to give you a buzz. Thanks!

Hello to you. I am initiating a search for the FAS Regional Commissioner position in San Francisco (SES).
Will have to go through the hiring process but I'm reaching out to folks who I'm hoping   might know of
an awesome leader who has federal acquisition experience and more importantly great skills in leading
an organization. And is interested in living in San Francisco of course. If you think of anyone or would
like more details on the specifics, let me know. Thanks, Mary
